WORK EXPERIENCE

Knowledge Streams | **MERN Stack Trainee**   **(Jan 2024 – Apr 2024)**

- Underwent rigorous training in MongoDB, Express.js, React.js, and Node.js as a MERN Stack Trainee at Knowledge Streams.
- Actively participated in project simulations to apply learned concepts and techniques in real-world scenarios.
- Demonstrated proficiency in troubleshooting technical issues encountered during project development.
- Prioritized continuous skill enhancement through self-directed study and exploration of additional resources.
- Emphasized effective communication and collaborative teamwork to contribute effectively to development projects.

PROJECTS

Netflix Clone: | **Riphah International University**

- Developed a responsive Netflix Clone using HTML and CSS, ensuring cross-device compatibility.
- Implemented modern design techniques, including Flexbox and Grid layouts, to enhance visual appeal.
- Utilized media queries to optimize layout and styling for various screen sizes, prioritizing responsiveness.
- Collaborated with team members to address technical challenges and refine project features.
- Conducted thorough testing and received positive feedback for polished design and functionality.

Travelix (Travel agency website)

- Developed Travelix, a responsive travel website, using HTML, CSS, and Bootstrap, offering comprehensive options for travel booking packages, hotel reservations, and guide bookings.
- Utilized Bootstrap framework to streamline development and ensure responsiveness across various devices, enhancing user experience.
- Implemented interactive features such as dropdown menus and modals to facilitate seamless navigation and booking processes.
- Integrated custom CSS styles to enhance the visual appeal and branding of the website, ensuring consistency across pages.
- Collaborated with team members to gather requirements and incorporate feedback, resulting in a polished final product.

CORE SKILLS

Programming Languages: C**,** C++, JavaScript
Developer Tools: Git, GitHub, VScode, Postman
Frameworks: React JS, Node JS, Express JS,
Databases: MySQL, PostgreSQL

TRAINING & CERTIFICATIONS
Google Cloud Computing Foundation | Google
Foundations: Data, Data, everywhere | Coursera
Ask Questions to Make Data-Driven Decisions | Coursera.

EDUCATION

Riphah International University   **(2021-2023)**
Associate Degree Program Computer Science CGPA (3.64)
